Gentlemen:

FYI: Shown below are the message I sent to Mr. Holy shortly after Phil asked me to prepare an answer to his first e-mail message to EPA Region 6, and the e-mail he sent me as a follow-up to the conversation we held over the phone on June 25, 2008.

Initially, I had no idea of which project Mr. Holy was talking about, and after learning that he was referring to the Goliad Project, I asked him to be more specific about what concerned him regarding this project.

In his attempt to answer my question he mentioned that he was going to refer my questions to two of his friends for details, and that he would contact me via e-mail. His first e-mail appears below.

Subject: Re: Your "Urgent Attention Required" Message

Mr. Torres,

I was a real pleasure getting to talk to you, today. I have sent messages to some of my constituents

that have been more involved than I on water issues, requesting information on the City wells, their designated usage, aquifers in the nearby underground counties, including Victoria, our river useage documents, underground water districts, in the Victoria vecinity, information on what has happen already in the City of Goliad, Tx, in regard to the underground well damages, and other issues directly pertaining to the very reason, we should not leave behind sources of contamination for some generation down the line in the future to discover, just to wonder, what the hell happened underground here, and why such a travesty was allowed after the concerns were documented. I would like to remind you, at this time, of my immediate position of the strong implication refurring to the EPA being pro 'for' the

protection of the environment, and  
not in the biz of allowing infractions or what could or would, perhaps be considered as a minor  
indiscrepancy, for the convenience  
of insufficient consensus where industrial management toward representation is merely the  
personal influence of what is environmental  
truths, as the public, being misrepresented and plagiarized by insufficient usage of evidence. The  
people put their TRUST in this office,  
and they should have to be asked whether it's ok in their area, to allow for lax policy on pollution  
control. We construe this as an attempt  
to disregard your main duties, and in time, we will see to it that this office is rearranged in an  
attempt to secure members who can understand  
what needs to be done, for sake of environmental quality, not . . . . eTc. . . .

Please allow me a

little time, and I will get back to you on the  
water levels, tables and any structured water usage that is established in the Victoria area, or  
what the people should be able to acquire, under the  
assumption they weren't misled by the GOV Committees that regulate, not deregulate, their  
authorities !

Respectfully

Robin

M. Holy

Dear Robin M. Holy:

Thank you very much for your e-mail message addressed to EPA, Region 6  
concerning an application for obtaining the new UIC permit No. UR3075,  
now before the Texas Commission on Environmental Quality (TCEQ). Your

message has been referred to my Section, the Ground Water/UIC Section, and I am eager to visit with you to learn the details of what has prompted your concerns.

I would like to take this opportunity to invite you to give me a call at (214) 665-8092 or e-mail me at [torres.jose@epamail.epa.gov](mailto:torres.jose@epamail.epa.gov) providing a telephone number where you can be reached. I will be more than happy to give you a call at a time that is convenient for you.

I look forward to hearing from you. Have a nice day. Sincerely,

Jose Eduardo Torres - 6WQ-SG  
EPA, Region 6  
(214) 665-8092
